

Seasons – Measurements of Time

There are four seasons in every year. Does anyone know what they are? Spring, Summer, Autumn, which we also call Fall, and Winter. What season is it now? The seasons always follow each other in the same order, like this:

Spring is the season when the flowers begin to 'spring' from the ground. Birds build nests and baby animals are born.

Summer is the season of flowers and fruit and sun. We swim and play out of doors.

Fall is the season when the leaves turn red and yellow and start to 'fall' from the trees. It's time for bonfires and Halloween.

Winter is the season of cold and snow. It's time for sledding and building snowmen and sitting in front of the fire drinking hot chocolate.

Spring is often rainy; we need to wear galoshes to play out of doors. In summer, we wear shorts and swimsuits and need to remember our hats and sunscreen. Autumn is windy; the farmers are harvesting their fruit and vegetables and we need to get out our jackets again. Winter is cold; we need jackets and toques, gloves and scarves. Sometimes we need snow-boots and snow-pants as well. Which is your favorite season?
